

SOLOSTAR REBORN

A new life for your
Solostar Insulin Pens

Recycling your used Solostar insulin pens is easy!

Drop them off at the recycling bin, at your convenience

HOW CAN I RECYCLE MY USED SOLOSTAR INSULIN PENS?

01

STORE THE PEN(S) AFTER USE

Remove and throw any attached needle into the sharps bin. Check that the Solostar insulin pen has been emptied of its content. You may store the pen(s) into a recycling bag.

Scan to learn how to remove insulin needle

02

PROCEED TO THE SOLOSTAR RECYCLING BIN

Bring the used Solostar insulin pens back to your endocrine clinic/ pharmacy* and locate its recycling bin designated for Solostar insulin pens.

* Depending on which healthcare institution, the Solostar recycling bin may be situated at the endocrine clinic and/or the pharmacy.

03

EASY DROP-OFF

Drop off your used Solostar insulin pens at the designated recycling bin!

WHAT WILL HAPPEN TO THE RECYCLED PENS?

- These pens will be processed and converted to a synthetic material called NEWBitumen through tech and environmentally safe techniques.
- NEWBitumen replaces traditional crude-derived Bitumen for road construction, reducing the overall reliance on fossil fuel-derived materials.

This leaflet is intended for patients on Solostar insulin pens only
