Aşırı kilolu olmayan, hem ERT ile tedavi edilen hem de edilmeyen Gaucher hastalarında insülin direnci gösterilmiştir.

Ucar SK et al. A cross-sectional, mono-centric pilot study of insulin resistance in enzyme replacement therapy patients with Gaucher type I without overweight. Mol Genet Metab 2009;96:50-1.

Insulin resistance have been demonstrated in untreated patients with Gaucher type I disease. It was implied in overweight enzyme replacement therapy (ERT) treated patients with Gaucher type I disease. In present study we investigate whether insulin resistance is presented in fourteen ERT treated patients with Gaucher type I disease and without overweight in comparison to normal subjects. This work illustrates the presence of insulin resistance in non-overweight ERT treated patients with Gaucher type I disease.
